

EXHIBIT X

Summary of opinion regarding utility of viral and other pathogen testing relating to Inquiry into the convictions of Kathleen Megan Folbigg

Professor William Rawlinson AM FAHMS BSc (Med) MBBS PhD (Cantab) GCM FRACP
FRCPA FFSc FASM

Senior Medical Virologist, Virion Australia P/L PO Box 872 Lane Cove NSW 2066

T: +61-2-93829113 F: +61-2-98030209 , E: w.rawlinson@unsw.edu.au

In relation to the discussion with Ms Gail Furness SC, Ms Georgina Wright and Ms Amber Richards on the 28th November 2018 and previously with Ms Amber Richards, the issue relating to the molecular testing of stored formalin fixed, paraffin embedded (FFPE) post mortem tissues from the children of Ms Folbigg include:

1. Contamination of the specimens taken
 - a. The molecular tests are highly sensitive, detecting very small amounts of nucleic acid (DNA and RNA) from tissues.
 - b. The specimens are unlikely to have been stored appropriately for sensitive molecular testing, as storage of FFPE specimens taken post mortem is for different testing purposes. This can result in cross contamination between tissue specimens, resulting in a falsely positive result in the contaminated, but uninfected, tissue.
 - c. Specimens taken ~20 years ago will not have been stored consistent with more recent protocols for molecular testing.
2. Deterioration of specimens over time
 - a. Specimens are likely to have deteriorated over time.
 - b. Preservation due to FFPE processing does preserve some of the nucleic acids (DNA and RNA) detected in sensitive molecular testing for pathogens.
 - c. However, the nucleic acids deteriorate over time, and are also affected by the FFPE processing.
 - d. This reduces the sensitivity of detection (that is how easily we detect small amounts of pathogen) making the interpretation of results very difficult.
3. Detection of a pathogen (virus, bacterium, fungus, protozoan)
 - a. Detecting a virus does not determine causality, although it is a contributor to the clinical interpretation. In a subset of patients detection of a pathogen, by way of example Herpes Simplex Virus (HSV), in a normally sterile site (cerebrospinal fluid) is almost always associated with disease and would be typically regarded as the cause of death. However, these need to be recently collected, properly stored, and highly specific clinical settings.
 - b. That is, just because a particular virus or other pathogen is present, it does not mean it has caused the disease or death the child. The detection is always interpreted in line with the clinical setting. This setting includes how the child presented clinically, the history of the illness, the clinical examination, and in cases of death, the findings at autopsy.
 - c. Detection does not mean the virus has caused death.
4. Definitive testing is anatomical pathology, showing inflammation or causative effects on tissue. This is the usual reference standard.

5. The tests currently manufactured are not licensed for definitive testing of autopsy tissue. Such licensing through the Therapeutic Goods Administration (TGA) is specific about which analytes (that is the starting tissue or material) upon which tests can be performed. This does not, in general, and specifically in most molecular virology tests, include post mortem FFPE material.

In summary, although it is possible to perform sensitive molecular tests for infectious pathogens including viruses on FFPE tissue taken at post mortem, there exist highly significant issues regarding testing, interpretation, and conduct of the tests, which at this stage are not able to be resolved satisfactorily to make the tests useful in determining cause of death in this case.

Professor William David Rawlinson AM FAHMS
BSc(Med) MBBS PhD GCM FRACP FRCPA FASM FFSc

Current Appointments

- Director of Serology and Virology Division (SAViD), NSW Health Pathology Randwick Microbiology, The Prince of Wales Hospital, Randwick
- Senior Medical Virologist, SESIAHS & The University of New South Wales (since 1997)
- Staff specialist in charge of Diagnostic Virology, Microbiology Department, Prince of Wales Hospital, Randwick (since 1997)
- Director TGA licensed NSW donor screening laboratory (since 2008)
- Consultant Senior Staff Specialist Prince of Wales Hospital
- Consultant Senior Staff Specialist Prince of Wales Private Hospital
- Consultant Senior Staff Specialist Sydney Children's Hospital
- Consultant Senior Staff Specialist Royal Hospital for Women
- Adjunct Professor, School of Biotechnology and Biomolecular Sciences, Faculty of Science, The University of New South Wales, Kensington (since 1997)
- Conjoint Professor, School of Medical Sciences, Faculty of Medicine & The Prince of Wales Clinical School, The University of New South Wales, Kensington (since 1997)
- Adjunct Professor, School of Women's and Children's Health, Faculty of Medicine, The University of New South Wales, Kensington (since 2017)
- Deputy Chair, Serology Quality Assurance Program, Royal College of Pathologists of Australasia Quality Assurance Program (Foundation Chair 2000 to 2015)
- Foundation Chair, Biologically-sensitive Quality Assurance Program, Royal College of Pathologists of Australasia Quality Assurance Program (since 2008)
- Member of editorial board Journal of Medical Virology (2015), Pathology (2000), Food and Environmental Virology (2008), Microbiology Australia (2003), Hong Kong Medical Journal (2015), Reviews of Medical Virology (2018)
- Chair WHO Measles Elimination Committee, Commonwealth of Australia

Qualifications

Academic Qualifications:

2002	GCM (Graduate Certificate of Management), AGSM University of NSW
1994	PhD (Cantab), University of Cambridge, UK
1983	MBBS, University of Sydney
1983	BSc (Med), University of Sydney, graduated with distinction

Professional Qualifications:

2016	FAHMS (Fellow of the Australian Academy of Health and Medical Sciences)
2011	FFSc (Fellow of the Faculty of Science of The RCPA)
1998	FASM (Fellow of the Australian Society of Microbiology)
1996	FRCPA (Fellow of the Royal College of Pathologists of Australasia)
1994	MASM (Member of the Australian Society for Microbiology)
1990	FRACP (Fellow of the Royal Australasian College of Physicians)

Registration:

NSW Medical Board (1983; No.MPO192638), General Medical Council, UK (1984; No.3035126)
ECFMG, USA (1985; No.392-614-4), Hong Kong Medical Council (1994; No. M09370)

Awards and Other Recognition

2016	Elected Fellow of the Australian Academy of Health and Medical Sciences (FAHMS)
2012	ASM bi-annual Goldsworthy lecture <i>Viral infections of pregnant mothers and their babies – research to reduce virus transmission</i>
2012-2019	Member of the NHMRC Research Translation Faculty
2012	Inaugural Visiting Professor, Centre National de Référence de CMV, INSERM 1092 France
2011	Member of the Order of Australia (AM)
2010	Founding Fellowship of the RCPA Faculty of Science
2007 - 2017	NHMRC Practitioner Fellowship, Level 2
2010	RCPA Visiting Professorship
2007	Gold Medal Australian Council on Healthcare Standards (ACHS)
2005	Fenner Prize Australian Society for Microbiology
1997	Australian Society for Infectious Diseases RACP Travel Grant
1995	Award for Advanced Research in Infectious Diseases, Glaxo
1993	Research Associateship, Department of Pathology, University of Cambridge
1992	The Eric de Bunsen Award, King's College (Cambridge, UK)
1990-1991	The Sir Robert Menzies Memorial Scholarship in Medicine
1989-1993	Overseas Research Students ORS Award, Committee of vice-chancellors and principals of the universities of the UK (University of Cambridge)
1989	King's College external studentship (Cambridge, UK)
1989	Royal Australasian College of Physicians Fellowship in Infectious Diseases
1983	Most valuable intern, Concord Hospital, NSW
1979	BSc (Med) student research award (Eli-Lilly)

Membership of Professional Associations

The Royal Australasian College of Physicians (FRACP since 1990)
The Royal College of Pathologists of Australasia (FRCPA since 1996)
Australian Society of Microbiology (since 1987; MASM since 1994; FASM since 1998)
Faculty of Science, RCPA (FFSc since 2011)
Australian Society of HIV Medicine (since 1997)
Australasian Society of Infectious Diseases (since 1987)
Australian Medical Association (AMA) member no. M192638;
American Society of Microbiology USA (since 1989)
Cambridge Philosophical Society UK (1989-93)
The Royal Society of Tropical Medicine and Hygiene (Fellowship in 1985-2000; No.A816)
Society for General Microbiology UK (since 1989)

Previous Experience

2004-2008 Associate Professor, Department of Cellular and Molecular Biology, Faculty of Science, University of Technology, Sydney
1996 Staff Specialist (Locum) in Virology, ICPMR, Westmead Hospital
Consultant, Centre for Infectious Diseases and Microbiology (CIDM)
1994-1996 Clinical Senior Lecturer, University of Sydney
1994-1996 Clinical Fellow in Virology, ICPMR, Westmead Hospital
1993 Research associate, Dept. of Pathology, University of Cambridge
1989-1993 PhD student, Dept. of protein nucleic acid chemistry, MRC Laboratory of Molecular Biology, Cambridge, UK
1989 Virology Registrar, Westmead Hospital
1987-1988 Infectious diseases registrar and Acting Clinical Superintendent (Medicine), Westmead Hospital
1985-1986 Basic physician trainee, Concord Hospital (Terms: Professorial Medicine, Rheumatology, Cardiology, Gastroenterology, Haematology, Neurology, Renal, Respiratory, Rheumatology)
1984 First year resident medical officer, Concord Hospital (ICU, Neurology, Casualty)
1983 Intern, Concord Hospital, NSW. (Casualty, Cardiology, Urology, Gastroenterology, Orthopaedics)
1979 Scientist, Immunology laboratory East Arm Leprosy Hospital, Darwin, and Department of Immunology, Sydney University
1978 Nurses aide, Lorneville Hospital, New Zealand
